**\*\*\* Please note: The pre-dentistry curriculum prepares students for the Dental Admission Test (DAT) and entrance into dental school. Although some dental schools do not require a baccalaureate degree (BA/ BS) for admission, it is highly recommended that students plan to complete a bachelor's degree prior to matriculation. Typically, students choose to follow a degree program in biology or chemistry-biochemistry, although other majors may be pursued. Students are strongly encouraged to obtain prerequisite information from the schools to which they will be applying and to work closely with their pre-health advisor when selecting appropriate coursework to meet the prerequisite requirements.**
